

HEBA HESHAM

Back-End Developer | ASP.NET Core | C# | RESTful APIs

Palestine, West Bank | [linkedin](#) | github : hebaayaseh | Available for Remote Work Worldwide

PROFESSIONAL SUMMARY

Motivated Computer Engineering student at Palestine Technical University – Kadoorie with hands-on experience building RESTful APIs using ASP.NET Core 8.0, EF Core, and C#. Completed 120+ hours of certified training in Data Structures, Algorithms, and Problem Solving. Passionate about writing clean, scalable back-end code and delivering secure, well-tested software solutions. Seeking a junior back-end role to contribute to a collaborative remote team while continuing to grow as a professional developer.

TECHNICAL SKILLS

Languages: C#, SQL, Java, C++, Python

Frameworks & Tools: ASP.NET Core 8.0, ASP.NET Web API, Entity Framework Core, JWT Authentication

Databases: MySQL, SQL Server, Oracle Database, SQL database design

Concepts: OOP, SOLID Principles, Data Structures & Algorithms, RESTful API Design, Back-End Web Development

Version Control: Git, GitHub

Languages (Spoken): Arabic (Native), English

PROJECTS

E-Commerce Backend API | *ASP.NET Core 8.0 | EF Core | C# | JWT | MySQL Aug 2025 – Present*

- Built a secure and scalable RESTful API for a full e-commerce platform supporting product catalog, order management, and user authentication.
- Implemented JWT-based authentication and role-based authorization to protect API endpoints (Admin / Customer roles).
- Designed and optimized relational database schema with EF Core Code-First migrations, reducing query complexity by structuring over 10 normalized tables.
- Developed Admin Dashboard API endpoints including revenue analytics, top-selling products, order status tracking, and category distribution.
- Followed SOLID principles and clean architecture patterns to ensure maintainability and scalability of the codebase.
- Hosted full project source code on GitHub: github.com/hebaayaseh/Ecommerce_ASP.NET

E-Commerce Console Application | *C# | OOP | Console Aug 2025*

- Developed an initial e-commerce simulation using C# console application applying OOP concepts (inheritance, encapsulation, polymorphism).
- Served as the foundation for the full ASP.NET Core API rebuild, demonstrating iterative software development thinking.
- Practiced problem decomposition and modular design before transitioning to a web-based architecture.

EXPERIENCE

Social Media Content Creator | [prime Academy](#) *Jan 2025 – Present • Palestine, Jenin*

- Produce and edit digital content (reels, stories, posts) to enhance the academy's online presence across social media platforms.
- Collaborate with the academy team to create clear, engaging material for technical educational content reaching 660+ followers.
- Apply creative problem-solving and communication skills to effectively convey technical concepts to diverse audiences.

- Manage content production pipeline and deadlines, demonstrating strong organizational and time management abilities.

EDUCATION

Bachelor of Engineering in Computer Engineering

Expected 2027

Palestine Technical University – Kadoorie | Tulkarm, Palestine

- Relevant Coursework: Data Structures, Algorithms, Object-Oriented Programming, Database Systems, Software Engineering, Computer Networks.

CERTIFICATIONS & TRAINING

Data Structures and Algorithms — prime Academy

Feb 2024

- Completed 60-hour hands-on training covering arrays, linked lists, stacks, queues, trees, and graphs with practical implementation in code.

Problem Solving and C++ — prime Academy

Sep 2023

- Completed 60-hour intensive training in logical thinking, algorithmic analysis, and structured problem-solving approaches using C++.

Back-End Development with ASP.NET Core — prime Academy

Sep 2025

- Currently completing advanced training in ASP.NET Core 8.0, EF Core, RESTful API design, JWT authentication, and SQL database integration.
