

JOB DESCRIPTION

Junior Back-End Developer (.NET / C#)

Company: TechNova Solutions | **Location:** Remote (Worldwide) | **Type:** Full-Time | **Level:** Entry-Level / Junior

About the Company

TechNova Solutions is a fast-growing software company specializing in building scalable web applications and RESTful APIs for clients across e-commerce, fintech, and SaaS industries. We are a fully remote team of passionate engineers committed to clean code, collaboration, and continuous learning.

Role Overview

We are seeking a motivated Junior Back-End Developer to join our growing engineering team. In this role, you will contribute to designing, developing, and maintaining robust back-end services using C# and ASP.NET Core. This is an excellent opportunity for a recent graduate or early-career developer who is eager to grow their skills in a real-world production environment.

Key Responsibilities

- Design, develop, and maintain RESTful APIs using ASP.NET Core 8.0 and C#.
- Implement and manage relational database schemas and queries using SQL Server or MySQL.
- Integrate Entity Framework Core (EF Core) for data access and ORM operations.
- Implement secure authentication and authorization using JWT tokens and role-based access control.
- Write clean, maintainable, and well-documented code following SOLID principles and OOP best practices.
- Collaborate with front-end developers and product managers to deliver full-featured software solutions.
- Participate in code reviews and contribute to improving team coding standards.
- Debug, troubleshoot, and resolve software defects and performance issues.
- Use Git and GitHub for version control, branching, and pull requests.
- Contribute to the software development lifecycle (SDLC) including planning, testing, and deployment.

Required Qualifications

- Currently pursuing or recently completed a Bachelor's degree in Computer Engineering, Computer Science, or a related field.
- Solid understanding of C# programming language and object-oriented programming (OOP) concepts.
- Hands-on experience or coursework involving ASP.NET Core and RESTful API development.

- Familiarity with relational databases (SQL, MySQL, or Oracle) and writing SQL queries.
- Basic understanding of Entity Framework Core or similar ORM tools.
- Knowledge of data structures, algorithms, and problem-solving techniques.
- Experience using Git / GitHub for source control.
- Strong analytical and problem-solving skills.
- Good written and verbal English communication skills.
- Ability to work independently in a fully remote environment.

Nice to Have (Preferred)

- Exposure to microservices architecture or distributed systems concepts.
- Familiarity with cloud platforms such as Azure or AWS.
- Experience with JWT-based authentication implementation.
- Knowledge of Docker or containerization basics.
- Previous internship or freelance experience in software development.
- Portfolio of personal or academic projects hosted on GitHub.

Technology Stack

- Languages: C#, SQL
- Frameworks: ASP.NET Core 8.0, Entity Framework Core
- Databases: SQL Server, MySQL, Oracle
- Tools: Visual Studio, Git, GitHub, Postman
- Concepts: RESTful APIs, JWT Authentication, OOP, SOLID Principles, Data Structures & Algorithms

What We Offer

- Fully remote position with flexible working hours.
- Competitive salary based on experience and location.
- Mentorship from senior engineers and structured learning path.
- Exposure to real-world production systems from day one.
- Collaborative and inclusive team culture.
- Opportunities for growth into mid-level and senior roles.
